

BSB51315 DIPLOMA OF WORK HEALTH AND SAFETY

COURSE OUTLINE

Want to advance your career as a work health and safety professional? Want to manage safety in your area of accountability to a higher level?

BSB51315 Diploma of Work Health and Safety is a nationally recognised program designed for people who currently or have an interest in coordinating and maintaining the work health and safety (WHS) program of an organisation.

By building on your existing experience and qualifications in WHS/OHS, this Diploma supports you in keeping everyone safe on site and in taking the next step in your WHS management career.

In this program you will learn the skills required to be a trusted safety professional in a wide variety of WHS contexts and industries. This Diploma also benefits those who are owners, directors or officers of construction companies who want a greater understanding of how to comply with WHS laws and understand how to create and maintain an effective WHS program for their business.

A key part of a WHS professional and any leader's role is the ability to provide informed advice and leadership as well as to manage risks and investigate incidents. You will learn how to contribute to developing, implementing and maintaining WHS management systems and to analyse and evaluate information from a variety of sources in order to provide safety solutions to a range of unpredictable problems.

Workplace Dimensions offers this nationally recognised course facilitated by some of the industry's best trainers, each of whom are highly experienced and qualified WHS practitioners.

OBJECTIVES

At the end of this course participants will be able to:

- > Effectively manage WHS consultation and participation processes
- > Establish, implement and maintain WHS risk management systems
- > Administer WHS information systems, measures and initiatives
- > Provide and develop WHS leadership
- > Administer and conduct WHS incident investigations

Prior to program	Preliminary research and reading – to be completed within 2 weeks prior to Module 1.
Module 1	3 days face-to-face undertaking 3 units, followed by 1 month to undertake case study project.
Module 2	3 days face-to-face undertaking 3 units, followed by 1 month to undertake case study project.
Module 3	3 days face-to-face undertaking 3 units, followed by 1 month to undertake case study project.

PREREQUISITES

The prerequisites for this course are the 5 core units of BSB41415 Certificate IV in Work Health and Safety. For those who are without the required prerequisites, Workplace Dimensions also offers a pathway WHS program - BSB41415 Certificate IV in Work Health and Safety. This is suitable for those beginning their career as a safety professional and there are no prerequisites for this program. Learners must also have sound literacy skills to enable them to adequately interpret text such as WHS legislation. If you are unsure if you meet the prerequisites for this for this program, please call us on 1300 453 555 to discuss your suitability.
